Fatigue

Water is the most important component of energy in the body. Dehydration is a condition that occurs when the body loses more water than it takes in, leading to fatigue and other symptoms.

Asthma and allergies

Water is essential for the body to function properly. Dehydration can lead to asthma and allergies, as the body is unable to produce enough mucus to protect the respiratory system.

High cholesterol

Water is essential for the body to function properly. Dehydration can lead to high cholesterol, as the body is unable to produce enough HDL (good) cholesterol to maintain healthy blood levels.

Diabetes or kidney problems

Water is essential for the body to function properly. Dehydration can lead to diabetes or kidney problems, as the body is unable to produce enough insulin to regulate blood sugar levels or to filter waste from the blood.

Constipation

Water is essential for the body to function properly. Dehydration can lead to constipation, as the body is unable to produce enough mucus to lubricate the digestive system.

Joint pain or arthritis

Water is essential for the body to function properly. Dehydration can lead to joint pain or arthritis, as the body is unable to produce enough synovial fluid to lubricate the joints.

Weight gain

Water is essential for the body to function properly. Dehydration can lead to weight gain, as the body is unable to produce enough energy to burn fat.

Premature aging

Water is essential for the body to function properly. Dehydration can lead to premature aging, as the body is unable to produce enough collagen to maintain skin elasticity.

High blood pressure
Water is essential for the body to function properly. Dehydration can lead to high blood pressure, as the body is unable to produce enough blood volume to maintain healthy blood flow.

Skin disorders

Water is essential for the body to function properly. Dehydration can lead to skin disorders, as the body is unable to produce enough moisture to keep the skin hydrated.

Digestive disorders

Water is essential for the body to function properly. Dehydration can lead to digestive disorders, as the body is unable to produce enough enzymes to break down food.

The average human body is 75% water.

75% water

Water is essential for the body to function properly. Dehydration can lead to a variety of health issues, including fatigue, asthma, allergies, high cholesterol, diabetes, kidney problems, constipation, joint pain, arthritis, weight gain, and premature aging.

Is Your Water Really Healthy?

RO water may look clean, but often it is **not healthy**. Why?

- 👉 RO water becomes **acidic**
- 👉 Removes **essential minerals**
- 👉 Gives only "empty water" with no life
- ✓ **RO technology is not bad** – the real question is **where and how it should be used**.
- ✓ According to **WHO**, safe drinking water must have **TDS between 100–200 ppm**.
- ✓ pH should be maintained naturally – not through **chemicals**.

✓ **Healthy water = Clean + Balanced Minerals + Correct TDS + Natural pH + Anti-Oxidation + Mico-Cluster**

Hunza Valley

Hunza people are uniquely healthy & routinely live Located at 7999 ft. in Northern Pakistan and is home of the longest lived to 120-140 years with virtually no cancer, degenerative disease, dental caries or bone decay. Research has proven that healthy long living people their local water the major common denominator of the which they drink directly which they drink directly which they drink directly from glacial streams in the high Himalayas. It is fresh, invigorating and life enhancing. This water is an example of Perfect Natural Water.

Dr. Henri Coanda, a Nobel Prize winner at 78 yrs old, spent six decades studying the Hunza water and the cause of such beneficial effects for the body.

They found Hunza water had a alkaline pH and an extraordinary amount of active hydrogen (hydrogen with an extra electron) with a negative Redox Potential and mineral content. The water is living and provides health benefits.

RO (आरओ) और Water Ionizer (वाटर आयोनाइज़र) दोनों पानी को बेहतर बनाने की मशीनें हैं, लेकिन इन दोनों का काम और तकनीक बहुत अलग होती है।

आरओ या वाटर प्यूरीफायर का काम पानी को साफ करना होता है लेकिन वाटर आयोनाइज़र का काम साफ पानी को स्वस्थ बनाना होता है

(1) Ionized water 8.5 pH to 9.5pH

Essential Three Properties

1) Anti-Oxidation

(Fights with Oxidative Stress)

2) Alkalization

(Fights with Acidic Stress)

3) Micro-Cluster

(Fights with Dehydration and support in Detoxification)

1. Antioxidant Property

Neutralizes harmful free radicals in the body. Protects cells and tissues from oxidative stress. Helps slow down aging signs. Strengthens the immune system and Reduces the risk of lifestyle diseases.

2. Alkalization Property

Balances the body's pH by reducing acidity. Neutralizes the effects of acidic food and drinks. Improves digestion and Supports better nutrient absorption.

3. Micro-cluster Property

Breaks down large water molecules into smaller clusters. Makes water easier to absorb by body cells. Deep hydration at the cellular level. Improves detoxification by flushing out toxins. Keeps skin healthy and glowing. Enhances metabolism and physical performance.

Alkalization

Dr. Otto Heinrich warburg

Discovered the real cause of cancer In 1923 and received the noble prize for physiology in 1931. In his work the metabolism of tumors he demonstrated that all forms of cancer are characterized by two basic conditions: **ACIDOSIS AND HYPOXIA (LACK OF OXYGEN)**

CANCEROUS TISSUES ARE ACIDIC, WHEREAS HEALTHY TISSUES ARE ALKALINE

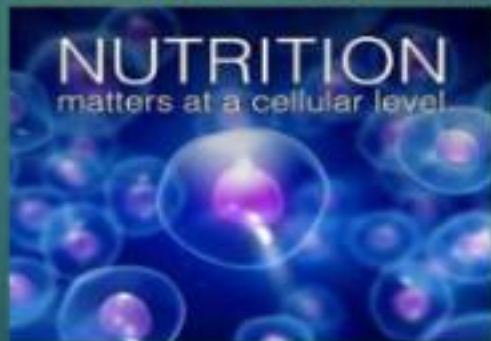

ऑटो हाइनरिख वॉरबर्ग (Otto Heinrich Warburg) एक प्रसिद्ध जर्मन जीव रसायनशास्त्री (biochemist) और चिकित्सक (physiologist) थे। उन्हें 1931 में नोबेल पुरस्कार से सम्मानित किया गया था। उन्हें "कोशिका के अंदर ऑक्सीजन के उपयोग और एंजाइमों की भूमिका" पर उनके अनुसंधान के लिए नोबेल पुरस्कार मिला। उन्होंने कोशिकीय श्वसन की प्रक्रिया को बेहतर समझने में महत्वपूर्ण योगदान दिया। ओटो ने पहली बार बताया था कि कैंसर कोशिका सामान्य कोशिका की तुलना में बहुत ही कम ऑक्सीजन ग्रहण करती है। उन्होंने हाइड्रोजन सायनाइड और कार्बन-मोनो-ऑक्साइड पर भी शोध की और बताया कि ये श्वसन-क्रिया को बाधित करते हैं। उन्होंने यह भी सिद्ध किया कि कैंसर कोशिका के पीएच और ऑक्सीजन उपभोग में सीधा संबंध होता है। यदि पीएच ज्यादा है तो कोशिका में ऑक्सीजन की मात्रा ज्यादा होगी। उन्होंने यह भी बताया कि कैंसर कोशिका में लेक्टिक एसिड और कार्बन-डाई-ऑक्साइड बनने के कारण पीएच बहुत कम लगभग 6.0 होता है।
